SUMMARY

Opera singer turned developer brings unique and useful transferable skills including persistence, a very strong work ethic, versatility, tenacity and dedication. Excels in communicating with others; developing timelines and lesson plans; creating systems for logistics; and coordinating with other departments. Passionate about problem solving, planning, learning, personal growth, and bringing ideas to life.

QUALIFICATIONS

- AWS Certified Cloud Practitioner
- Certified Scrum Developer
- Ability to develop high-performing web apps with Wordpress including custom plugins and widgets.
- Strong understanding of HTML5, CSS, SASS, Responsive Web Design and Web Accessibility.
- Experienced in JavaScript, jQuery and RESTful APIs.
- Background in Node.js, npm and Express.
- Firm knowledge of React, React Native, and Redux with experience in Vue.js and Angular as well.
- Exceptional skills in Agile Development, Test Driven Development, and Version control.
- Familiarity with AWS Lambda and MongoDB.
- Excellent analytical, interpersonal, written, and oral communication skills.

PROJECTS

Online Bible Commentary: A Refactoring Project for a SPA

- Refactored a bible reading app to not require a refresh or reload. Simplified the code from 4,293 lines to 262, enabling a quicker load time for user text navigation.

MyFlix: A Movies Application

- Built a REST API using JavaScript, Node.js, Express, and MongoDB for server-side and JSX, React and Redux for front-end.

Meetup: A Progressive Web Application

- Built a serverless app with React, using a test-driven development approach.

RECENT EMPLOYMENT

March 2022 – Current

Web Developer II, Andrew Wommack Ministries, Inc., Woodland Park, CO

February 2021 – March 2022

Web Developer I, Andrew Wommack Ministries, Inc., Woodland Park, CO

- Worked with the team to maintain and create new features on five different websites, with a strong focus on pulling video data from an external API to build video players and playlists.

September 2018 – June 2020

Administrative Assistant, Sacred Heart University, Fairfield, CT

- Developed a new attendance system to accurately and efficiently track attendance for a choral program of over 200 students. Utilized strong time and task management, attention to detail, and good communication skills to organize the schedule of both students and staff.

EDUCATION

May 2020– October 2020

Certificate in Full-Stack Development, CareerFoundry

- Intensive project-based training specializing in both front-end and back-end development. Received training and guidance from a seasoned professional and created five apps from beginning to end.

August 2013 – May 2015

M.M Opera Performance, University of Maryland, College Park, MD

August 2009 – May 2013

B.M Opera Performance, SUNY Purchase College, Purchase, NY
